PROFILE SUMMARY

I am a vocational IT student at SMK TI BAZMA with a strong interest in software development, Internet of Things (IoT), and computer networking. I enjoy building technology-based solutions through programming and hardware integration, while continuously improving my technical and problem-solving skills. I also have a strong interest in English communication and aspire to study or work abroad in the future.

SKILLS

Programming : JavaScript, Next.js, Laravel, TypeScript, SQL, React.js, Tailwind CSS	Tools : VSCode, Canva, Github, Capcut, Figma	Language : Indonesia(native), English(B2 Intermediate)
--	---	---

EDUCATION

SMK TI BAZMA – SIJA Focused on Information Technology through a 4-year vocational education program, covering programming, computer networking, Internet of Things (IoT), and digital design, with both theoretical learning and hands-on project experience.	2023 - Now
---	-------------------

ORGANIZATION

Multimedia Division — Student Council, SMK TI BAZMA Created visual content and documentation for school events through photography, videography, and graphic design. Collaborated with teams to support event branding, communication, and digital media production.	2024 - 2025
Member — McROBO (SMK TI BAZMA Robotic Club) Worked collaboratively on robotics and IoT-based projects involving microcontrollers, sensors, and embedded programming. Developed technical skills while improving teamwork, communication, coordination, and problem-solving through project-based learning.	2024 - 2025

PROJECTS

CulinerYuk — SaaS Culinary Platform Developed a culinary web platform as a final SaaS project using Next.js, Tailwind CSS, PostgreSQL, and Supabase. The website provides a modern and responsive user experience for exploring culinary content and managing data efficiently.	2026
IoT-Based Door Security System with RFID Designed and developed a smart door security system using ESP32 and RFID technology, enabling secure access control through authorized card authentication.	2025
Embedded Snake Game on OLED Display Built a compact Snake Game on an OLED display using Arduino and C++, implementing game logic, hardware interaction, and embedded system programming.	2024

TRAINING & CERTIFICATIONS

<u>Exemplary Religious Practice Award</u> Issued by: SMK TI BAZMA	2025
<u>ASEAN Data Science Explorers</u> Issued by: ASEAN Foundation & SAP	2025
<u>ESQ The Amazing You 5</u> Issued by: ESQ Corp	2025
<u>Introduction to Information Security Course</u> Issued by: Cyber Academy	2025
<u>Capture The Flag Competition Participant</u> Issued by: Politeknik Negeri Bali	2024
